pi (.

plurality of said thermally conductive fibers extending from said thermally conductive surface into said cavity; and

(c) a phase change material changing from its initial phase to its final phase responsive to the absorption of heat disposed in said enclosed cavity/and in said porous material.

Cancel claims 13 to 16 without prejudice.

## Amend claim 17 as follows:

521. (Amended) The heat sink of claim 1[3] wherein said thermally conductive fibers are graphite.

 $\sim$  Amend claim 18 as follows: )

618. (Amended) The heat sink of claim [14] 2 wherein said thermally conductive fibers are graphite.

Amend claim 19 as follows:

519. (Amended) The heat sink of claim [15] 2 wherein said thermally conductive fibers are graphite.

Amend claim 20 as follows:

10. (Amended) The heat sink of claim [16] & wherein said thermally conductive fibers are graphite.

## REMARKS

Claims 13 to 16 have been cancelled without prejudice and the subject matter thereof added to claim 1 so that claim 1 now claims
